Semi-Automatic Table Top Eyeleting Machine

The Joyce C4 Hand-lever Eyelet Machine.

This fully portable Table top hand operated eyeletter is supplied with its own base to facilitate use on any bench or table top. The eyeletter simultaneously inserts and clenches the eyelets in one operation.

The transparent hopper holds approx 1200 eyelets which are fed automatically down the chute to the eyelet dies with every pull of the handle.

The eyeletter is mostly of solid metal construction and takes the industry standard No.24 and No.25 eyelets which are available in Brass or Nickel finish. The heavy weight of construction ensures many years of trouble free operation. The eyeletter is suitable for many applications including luggage tags, clothing labels, Wills, and security documents, the extra deep throat depth of 165mm accommodates even the largest calculator discs, while the adjustable back and side lays ensure accurate positioning of the work.
